

I feel that the Wisconsin no call law should not be weakened by changing it to what the bankers and others want for the benefit of their business. For some time now we have enjoyed not being interrupted by annoying phone calls that we just have to hang up on. If anything the law should be strengthened. We should include politicians and charitable organizations on the no call list. It seems inappropriate that the law makers exempt themselves from the law. During the past election we received 7 or 8 calls a day from those running for office. It is very disruptive when you are trying to enjoy the privacy of your own home. Please don't change our law. Thank you for listening.
